A complete, detailed index is still to be done, but this Guide goes a long way toward making all 50 issues readily accessible. Most back issues are still available. To order back issues, see the end of this Guide, page 62. We have broken the articles down into the following categories: Life History; Folklore (which includes tales, cures, the supernatural, and crafts); French and Gaelic (articles that include those languages) and Micmac (articles about Micmac people and culture, as well as the language); Natural History and Fishing; Industrial History (articles dealing with factories, mines, trains, lumber woods, steel plant; lobster factories are included here rather than under Fishing); Music/Poetry; Shipwreck; Academic/Reprint/Document (this includes previously-published material; as well as material based primarily on research rather than first-person experience); Speaker/Writer/Interviewer. Some articles will appear in more than one category • for example "A Visit with Frank and Margaret MacRae," besides being Life History, includes Gaelic, songs (Music/Poetry), and tales (Folklore). An article such as "Joseph D. Samson: 'Guillaume Sans Peur'" appears under both French and Folklore. Here's how to understand our symbols: Each item in every category is followed by two numbers separated by a slash (/). The first number is the Issue Number, and the second is the Page Number in that issue. For example, "Bill Forbrigger and Coastal Schooners 38/57" means that article can be found in Issue 38 on page 57. Or, "Bowden Murphy: 24 Years Splitting Fish 34/IFC" means the article begins on the Inside Front Cover of Issue 34. "BC" means the article begins on the Back Cover. In the Speaker/Writer/Interviewer category, the numbers refer only to the page on which that person first appears in a particular article. He or she may also speak later in that same article.
