WRECK COVE • CAPE BRETON • NOVA SCOTIA = . (Education in Nova Scotia y = v % In the whole inner processes of education, there are three series, distinct in their object, their aims, and their difficulties. The first is designed to awaken mind, to beget a thirst for knowledge, with the means and methods of acquiring it; the second, to confer that intellectual and moral information and discipline which is the common basis of all liberal culture; and the third, to qualify for particular occupations. The primary business of the School is not so much to impart knowledge, as to awaken a demand for it, and to furnish the means of meeting that demand. If there is no felt want of a thing, no effort will be put forth to get it. If there is no taste or relish for any one object, there will be no desire for it, and, by consequence, no exertion made for its possession. Report of the Superintendent of Education for the Province of Nova Scotia for the Year 1862. Our enviable reputation in Nova Scotia in the education field is largely because of our conviction that education is important . . . just as important today as it was 119 years ago. As home of the first public school system in Canada, we have a fine tradition to maintain and we are working hard to do just that.
