glove. We had to wash them, patch them, powder them, put them up in cotton cases. And all that had to be done. All bedpans had to be sterilized. And the nurses collected them. We were allowed to give hypodermics, but we were never allowed to take any blood from a patient. When I was in training, we weren't allowed to take blood pressure. It would be done by a medical student or the doctor. But there was wonderful supervision. You were watched all the time. We had to make beds. When the patient went home, we had to strip the bed, we had to lysolize--ly- sol solution--to the mattress. Every bed The number of forest fires in Cape Breton is increasing. Last year between April and October, 50 were reported. Fortunately, fast action, by Lands and Forests crews and volunteer fire fighters put them out before they did do much damage. Because even a small brush fire can get out of control and ignite nearby trees in seconds, early detection is essential. had a rubber sheet on at that time. And that had to be, and everything had to be-- use lysol solution and clean everything. We had white enamel beds with brass knobs on. Doorknobs. The nurse polished those brass knobs 6 days a week, never on a Sunday. That was important. And every spread had to be so. The head nurse would stand at the head of the ward--I think I see her! If there was one spread that wasn't exact, she'd go over and she'd tear the whole bed apart. And the chairs were wooden chairs at that time. We had to wash down the chairs. The windows in the old hospital came right down to the floor. And we had to clean that window ledge every day. had to clean the bedside table every day. WRE FIIU! If you see a fire in or 'ea' the woods, contact your local Lands and Forests office or Sub-Ranger immediately. If there is no answer, call Zenith 40000.
