Anyway, she made the final effort, and she got on her feet. She stood there. Well look, those other horses were so pleased-- they came up and started talking to her. And you believe me. They'd go down so far in the field. And she hadn't made a step yet. And they'd go so far. And they'd come back--three other horses. They're there in the field yet. They'd come back. And she came along right after that. She's there in the field today.... So that's all I can tell you about her. She was used on sleigh rides last winter along? side the other mare. (And you feel the horses were taking her to where the better aftergrass was.) That's apparently--seemed like that. The other, where they were grazing up, wasn't good enough for her. They pointed right--I can take you and show you where they took her, was right on the side of the hill where there was lush grass. It's hard to believe.
